

REMARKS

AMENDMENTS

Claims 1-3, 8, 14-17, 20, and 22-23 are amended herein. The amendments introduce no new matter and place the claims in *prima facie* condition for allowance. Accordingly, applicants respectfully request that they be entered and that the case be passed to allowance.

REJECTION UNDER 35 USC §112, ¶2

The examiner maintains rejection of claim 22 under 35 USC §112, ¶2 for indefiniteness. Applicants again point out that the claim is drawn to compositions comprising an active ingredient mixed with conventional crop protection auxiliaries. No improper “use” is recited, as the adjectival phrase “which are conventionally used for formulating crop protection agents” simply modifies the noun “auxiliaries.” However, in order that the examiner may be entirely certain of this fact, applicants have amended claims 22 and 23 to place the modifying phrase in compound adjective form, now preceding the noun “auxiliaries.”

REJECTION UNDER 35 USC §112, ¶1

The examiner also maintains rejection of claims 1-12 and 14-24 under 35 USC §112, ¶1 for lack of enablement. It is the examiner’s stated opinion that the specification “does not provide enablement for 3 cyanos, nitros or other electron

withdrawing groups on R¹ equal to phenoxy in the ortho position," or where R¹, R⁵, and R⁷-R⁹ include a heterocyclyl radical. Though applicants remain convinced that one of skill in the art would find ample support in the present specification to make and use the entire range of compounds as originally claimed, to speed prosecution, the claims have been amended to accommodate the examiner's views. These amendments should not in any way be viewed as acquiescence in the examiner's considered opinion.

The claims are amended to remove the possibility for phenoxy to be substituted by more than two electron withdrawing groups, and to remove all heterocyclic radicals from R⁵ and R⁷-R⁹. Accordingly, the examiner's concerns on the issue of enablement should be met, and per the examiner's view, the claims are now in condition for allowance.

CONCLUSION

In view of the accompanying amendments and remarks, applicants consider that the rejections of record have been obviated and respectfully solicit passage of the application to issue.
